Bioinformatics? - Why do Light and Love Relate to God and Darkness and Hatred to Evil?

By Prof. Maria Kuman
Holistic Research Institute

Abstract- The article explains why the Creator God is always associated with Light and Love and Evil always associated with darkness, hatred, and anger. Black Holes of anti-matter created the whole material world and the nonlinear electromagnetic field (NEMF) that separated the anti-matter from the matter got imprinted on all material creations. Thus, everything material is a material body and light nonlinear electromagnetic field (NEMF). All living beings have second nonlinear electromagnetic field, which is magnetically intertwined with the NEMF of the material body. We see this second NEMF as "aura" ("or" means "light" in Hebrew). Since this second NEMF rules and regulates everything in the body and by being emotional allows emotions to modify the functioning of the body, we call it Spirit. The Creator gave us the emotional Spirit and gave us the freedom of choice. If we choose to be always positive - Loving, Forgiving, and Helping Others - our auras (Spirits) will have more light (because we are more God-like), and we will be happy and healthy. However, if we choose to be negative - hating and being angry - our auras (Spirits) will be dark (Evil-like) and we will be unhappy and not healthy (sick all the time).

Keywords: god and light; god and love; freedom of choice; evil and darkness; evil & hatred & anger.

I. God is Light and Love

Since time immemorial the Creator God has been always associated with light and Evil (Satan) with darkness. Why? My Grandfather Kuman was in a state of clinical death and when he came back he told the story of the journey of his Spirit. How his Spirit left the body, hovered over the body for three days (seeing and hearing all that was going on) before being able to leave. After leaving, the Spirit traveled through a long dark tunnel with light at the end of the tunnel.

When his Spirit arrived at the end of the tunnel, he felt this was not an ordinary light – it was Light woven with Love. He felt Loved and he was ready to join the BIG LOVE, when an angel ran toward him and told him to back because it is not yet his time. He is due to come at this date and year. And his Spirit came back to his body and the dead body became alive again. My mother was telling me this story and adding: "It is much better not to know when you will die. As the time of his death approached, he was saying "Don't count me I will not be here.'"

Intrigued, I spoke with many people, who have been in a state of clinical death. They all told me the same story of their Spirits hovering over the dead body for 3 days and 3 nights. Then their Spirits left, traveled along the dark long tunnel with light at the end of the tunnel, and when they finally arrived in front of the Light, they realized that it was not an ordinary light - it was a special kind of Light emitting Love. When they were ready to join the BIG LOVE, they were told they must go back to Earth. (However, they were not told the date they are due to come back).

Thus, the Creator-God is Light woven with Love. In my article [1], I showed that Black Holes of dark anti-matter created all material bodies, and the NEMF that separated the matter from the anti-matter got imprinted on all material creations, which are material bodies and light nonlinear electromagnetic field (NEMF). All living beings have second nonlinear electromagnetic field, which is magnetically intertwined with the NEMF of the material body. We see this second NEMF as "aura" ("or" means "light" in Hebrew).

Since this second NEMF rules and regulates everything in the body and by being emotional it allows emotions to modify the functioning of the body, we call it Spirit. The Creator gave us the emotional Spirit and gave us the freedom of choice. If we choose to be always positive - Loving, Forgiving, and Helping Others - our auras (Spirits) will have more light (because we are more God-like), and we will be happy and healthy. However, if we choose to be negative - hating and being angry - our auras (Spirits) will be dark (Evil-like) and we will be unhappy and not healthy (sick).

II. What can love do and why was Jesus Teaching "Love One Another"?

Here is what Love can do to our NEMF, which rules and regulates the functioning of all our organs. Scientific studies of the Heart Math Institute in California found that when people meditate on Love, their brain and heart have more harmonic vibrations [2] and harmonic functioning of the organs means healthy organs. Thus, Loves means harmony. If so, only a Creator-God, who is Light woven with Love, could create a Universe in perfect harmony.

Humans perceive harmony as happiness, thus to be in harmony (happy) we must every day meditate on Love and practice Love, which means loving everybody and everything around us, and loving ourselves. It is the right way to behave and the Creator

put what is right in the hardware of our Quantum Computer in the Subconscious, which works with the waves of the Spirit (template of the hologram of the Creator). And when we don't behave according to what the Creator wants us to, which is in the hardware of the Quantum Computer, we always know we didn't behave right. The hardware says Love because Love brings harmony and harmony means health and happiness. This explains why Jesus was teaching Love your neighbor and even Love your enemies.

Loving, forgiving, and helping others was the teaching of Jesus and it seems to be the key to happiness, as well as good health. If we do this, we will not only be happy, we will be healthy because the Love will make the functioning of all our organs harmonic and synchronized, which means good health. Thus, Love makes you healthy and happy. When 200 people meditated on Love in Atlanta during Yogi convention, the violence in the city dropped down to zero. How this is possible and how this is done will be subject of another paper.

I spent almost 40 years of my life measuring the human NEMF (Fig. 1) called aura, which is our Spirit [3]. It is weak informational field 1,000 times weaker than the biocurrents of the body. I had to develop a special sensitive equipment to measure it. The measurements showed that at positive emotions (love, joy, etc.) or just positive thinking, the energy of the whole body increased and became more balanced. Since perfect balance means perfect health, positive emotions make us healthier [3]. Let us combine our measurements with the measurements of the Russian scientist Shkatov [4], [5] who developed and patented equipment, called 'torsemeter', which allows him to measure the spinning of our aura NEMF pictured on Fig. 1.

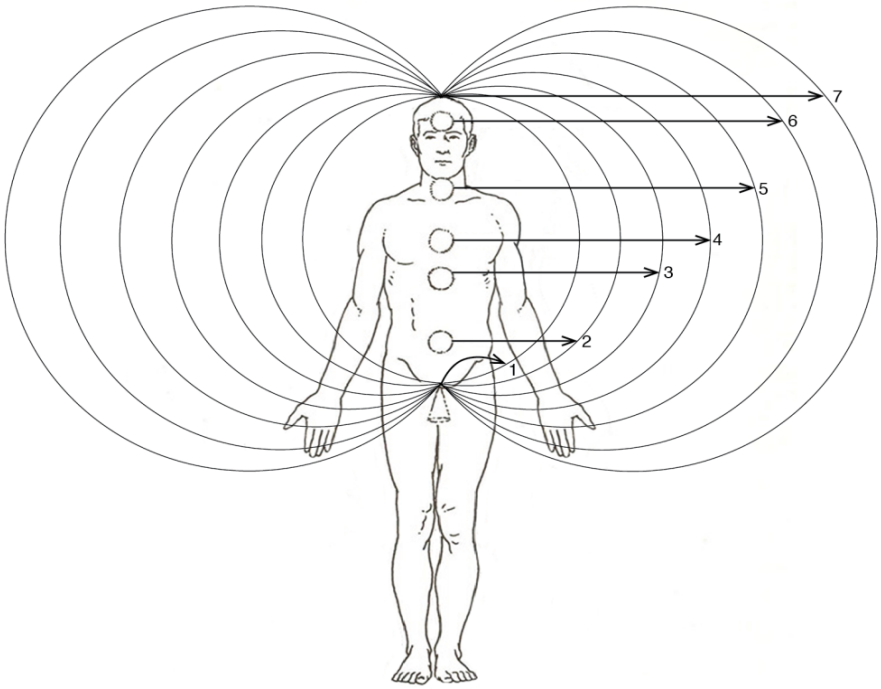

Fig. 1: Vertical cross-section of the torus shape NEMF of man, its chain of alternating vortices and anti-vortices along the backbone called chakras, and their corresponding energy levels

III. What do Positive Emotions and Positive Thinking Do?

Shkatov found that at positive emotions our aura spins clockwise [4], [5]. Nonlinear physics teaches that vortices spin clockwise and suck energy because according to the rule of the folded fingers of the right hand in physics, when the folded fingers of the right hand show the clockwise direction of spinning of the torus shaped NEMF (Fig. 1), the vertical thumb shows the direction of the induced by the spinning magnetic field, which determines the direction of the energy flow - downward (at p. 7).

This means that when we experience positive emotions, our aura spins faster clockwise and energy is sucked into our NEMF through the top of the head. This explains the uplifting we feel at positive emotions. Thus, positive emotions (like love) make our NEMF (Fig. 1) spin faster clockwise and suck energy through the top of the head, which makes us feel uplifted and makes the whole our aura shine brighter. The energy sucked through the top of our head makes the whole brain

lighter and brighter and makes the functioning of the brain and the whole body more harmonious.

Our emotional brain, which is called Limbic system, is in the Subconscious. It consists of two rings: The Ring of Positive Emotions and the Ring of Negative Emotions. Since our NEMF is nonlinear, the excited Ring of Positive Emotions easily spread to a global excitation of the whole brain [6]. All this means that when we experience positive emotions: loving, forgiving and helping others (like Jesus did) our aura (Spirit) will shine brighter and emit Love like the Creator God Himself. Indeed, MRI found that positive emotions (like love, joy, …) lighten the whole brain (like illuminating it).

Our measurements of the weak NEMF with my patented sensitive meter found that just positive thinking is enough to raise the energy of the Spirit (NEMF) and make it more balanced. Since perfect balance means perfect health, this means that positive thinking makes us healthier.

IV. What do Negative Emotions and Negative Thinking Do?

Since time immemorial darkness has been associated with Evil or Satan. Why? I found first with Kirlian photography and then through measurements of our aura field (NEMF) that negative emotions or just negative thinking decreases the shining of our aura, making it dimmer or darker. We speak about being "in low Spirit". This is because when we experience negative emotions or just think negatively the energy of our aura (Spirit) NEMF drops down [3].

Our measurements of NEMF [3] found that negative emotions or just negative thinking not only lower the whole energy, the energy balance becomes worse because the genetically inherited weak organ drops in energy maximum. Why? It is because negative thinking is distress (negative stress) and when stress is applied on a material, the material cracks at the weakest place. So it is with the body – negative thinking and negative emotions (distress) makes the body to collapse at the weakest place – the genetically inherited weak organ. Therefore, negative emotions or just negative thinking take us a step further to a disease of the genetically inherited weak organ.

The Russian scientist Shkatov measured with his patented 'torsemeter' the spinning of the aura at negative emotions and found [4], [5] that the aura spins counterclockwise. Nonlinear physics teaches that anti-vortices spin counterclockwise and emit energy because according to the rule of the folded fingers of the right hand in physics, when the folded fingers of the right hand show the counterclockwise direction of spinning, the vertical thumb shows direction upward of the induced by the spinning magnetic field, which determines the direction of the energy flow – outward at p. 7.

This means that negative emotions or just negative thinking make our aura (Spirit) to lose energy through the top of the head (Fig. 1), which makes our aura (Spirit) darker. Since at negative emotions or just negative thinking energy is lost through the top of the head, this makes the whole brain darker. MRI found that people diagnosed with Bipolar Disorder, depressed people, and drug and alcohol abusers (who are dominantly negative thinkers [6]) have darkness in the middle of the brain. First the Ring of Negative Emotions is darkened, but since our NEMF is nonlinear, the darkened Ring of Negative Emotions could easily spread to a global darkening of the whole emotional brain in the Subconscious [7].

Therefore, negative emotions (hatred, anger, jealousy, etc.) or just negative thinking (or Evil doing) darkens the aura (Spirit) and the central part of the brain, where the emotional brain is in the Subconscious. So, negative emotions, negative thinking, or Evil doing darken the brain and the whole Spirit. From here comes the connection Evil – darkness. Thus, the Creator-God gave us the freedom of choice. If we chose to be: loving, forgiving, and helping others, our aura will be light and bright, our Spirit high, and we will be healthy and happy. If we chose to be negative, angry, jealous, etc., our aura will be dark, our Spirit low, and we will be unhappy and not healthy.

V. Conclusion

The biggest gift of the Creator God is the freedom of choice given to us. However, the Creator put his requirements in the hardware of the Quantum Computer in the Subconscious, which operates with the waves of the Spirit – to do well we need to be loving, forgiving, and helping others. 1/ If we chose to be loving, forgiving, and helping others – we will be healthy and happy. 2/ If we chose to be negative, hating, and angry – we will be unhappy and not healthy (sick). Don't blame the Creator for your misery of being unhappy and not healthy – blame yourself for the wrong choices you have made in your life. If you have made the right choice of being loving, forgiving and helping others you would be healthy and happy.
